Precipitation probability					
10%	20%	20%	40%	40%	30%

Forecast for Sunday 11 Jun 2023

Weather: Early morning mist and low cloud soon clearing, otherwise a fine start with plenty of sunshine. Feeling warm or very warm lower down, but cooler at height. Some scattered showers will develop during the morning, becoming more widespread and heavier during the afternoon. Some of these showers will be thundery, with torrential downpours, hail and strong winds. Showers will be slow moving through the day, perhaps with a further area of heavy thundery showers moving up from the south overnight.

Chance of cloud-free hill tops above 600m: 60% at first, mainly in the west, becoming 90%.

Low cloud and visibility: 300-500m bases at first in the west with very poor visibilities in any low cloud. Otherwise mostly cloud free tops, but bases potentially falling to 600-800m in heavier showers. Good visibility outside of showers, with this dropping to poor in heavier downpours. Perhaps some low cloud re-developing later in the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Warm or very warm, with very high UV levels and high humidity, so sun protection and extra water highly recommended. A risk of heavy thundery showers, leading to slippery ground, swollen watercourses and possible flash flooding.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 11 Jun 2023	0.2mm	0.2mm	0.2mm

Forecast for Monday 12 Jun 2023

Weather: Another warm, humid day. Perhaps some mist and low cloud to start, with this a little slower to clear than Sunday morning. There will be plenty of sunshine on offer, though a further risk of heavy thundery showers during the afternoon, which may fall as hail at times.

Maximum wind: Mostly light easterly winds around 10 mph, but higher under any heavy showers.

Chance of cloud-free hill tops 600m: 60% to start, becoming 90% during the morning.

Low cloud and visibility: 500m bases possible at first, giving poor visibility in mist and hill fog. Thereafter, cloud free tops for much of the day, however the possibility of occasionally 600-800m bases in heavy showers or thunderstorms. Overall good visibilities, but dropping to poor in heavier showers.

Temperature: **Valleys:** Plus 13 Celsius, becoming plus 26 Celsius.
At 600m: Plus 13 Celsius, becoming Plus 17 Celsius
Freezing level: Well above summits.
